SUMMARY

It was during college when I discovered my passion for mathematics, and analytic problem solving in general. From there it was a long, diverse road that brought me to my current position. Through all of these experiences I have learned many different things about myself, and found a love for coding. The ability to solve a problem in a multitude of different ways, with each solution having different merits really speaks to me, and I am really looking forward to turning this newfound passion into a lifelong career.

EDUCATION

Pace University
B.S. Mathematics 2010

DevBootcamp
19 Week Full Stack Development Bootcamp 2016

PROJECTS

MyToiletPal

A web app that allows the user to see all public toilets around them, review public toilets, as well as add toilets that are not currently in our database. Built using Ruby on Rails and Foundation framework, and NYC Open Data for existing public toilet information.

ICYMI (In Case You Missed It)

An IOS app, with a webapp component, that shows the user a searchable list of every business they pass throughout the day in order to help them find places they may have missed during their day. Built with Rails on the backend, React Native for the mobile app and React for the webapp frontend.

Yoda Know

A star wars themed Stack Overflow clone. Built with Sinatra for the backend and using JQuery on the frontend, and Foundation framework.

DBC Algorithms

A web app built in Rails, using the Codewars Api. This app allows users to sign up, and register for upcoming algorithm whiteboarding sessions at Dev Bootcamp. Two days before the session is set to take place, the app pairs all of the users registered for that session, and emails them with their partner and the question they will be asking.

SKILLS

LANGUAGES: Javascript, Ruby, CSS, SQL, HTML, C#

MATHEMATICS: Calculus (through intro to Differential Equations), Linear Algebra, Algebraic Structures, Complex Analysis, Real Analysis, Discrete Mathematics with Combinatorics

FRAMEWORKS/LIBRARIES: Ruby on Rails, React, React Native, Sinatra, JQuery, .NET Core

TOOLS: Git, Heroku, Adobe Illustrator

ACTIVITIES

TechCrunch Disrupt Hackathon 2016

Competed in the TechCrunch Disrupt Hackathon. With a team of 5, we built a rails app that connects students to after school activities, and allows them to suggest new activities that they are interested in. If a teacher approves and an idea gets enough votes from other students, the activity opens up to parents to crowdfund the new activity to make it a reality. View the app here: [link](#).

EMPLOYMENT

Superfine Server

Server at a farm to table restaurant.

Daily changing menu required me to memorize and be able describe new menu every shift.

Brooklyn, NY
Sep 2009 to Feb 2016

CL Design Metal Finisher

Worked in the fabrication of custom chandeliers.

Finished and stained assorted of metals.

Brooklyn, NY
Aug 2015 to Feb 2016

Office Assistant

Assisted with various office tasks (editing product catalogs, uploading new photo's of chandeliers to the website, customer outreach).

Aug 2015 to Feb 2016

Math Tutor Self-Employed

Self-employed math tutor

Tutored up through College Level

Designed curriculum and practice problems for each students individual needs

New York, NY
Sep 2007 to May 2015
